

# Animations in Colloquium

Incremental reveal for slides

# Bullet-by-Bullet Reveal

- First, we define the problem
- Then, we propose a solution
- Next, we evaluate the results
- Finally, we draw conclusions

# Block-by-Block Reveal

This paragraph appears first.

This paragraph appears second.

This paragraph appears third.

# Step Markers

This content is visible immediately.

This paragraph appears on the first click.

And this appears on the second click.

# Composing Animate + Steps

- Point A
- Point B
- Point C

After revealing all bullets, this conclusion appears.

# Ordered Lists Too

1. Gather requirements
2. Design the system
3. Implement the solution
4. Write tests
5. Ship it

# Blocks with Mixed Content

Here is an introductory paragraph.

- A list of items
- That appears as one block

```
# Code appears as another block
def hello():
    print("world")
```

A final paragraph to wrap up.

# Steps in Columns

## Left Column

Content always visible on the left.

## Right Column

Right column content.

More right column content revealed on click.

# No Animation

This slide has no animation directives.

All content appears at once, just like before.

- Bullet one
- Bullet two
- Bullet three
